

EX.NO:3A DATE:

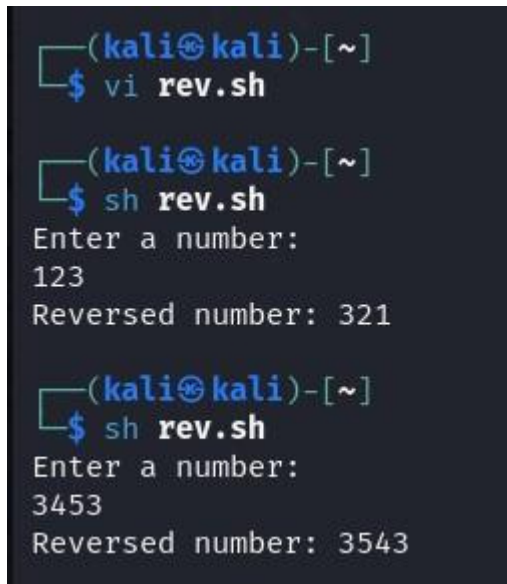

SHELL SCRIPT

AIM: To write a Shell script to reverse a given digit using looping statement.

PROGRAM:

```
echo "Enter a number:"
read n reverse=0 while
[ $n -ne 0 ]; do
remainder=$((n % 10))
reverse=$((reverse * 10 + remainder))
n=$((n / 10)) done
echo "Reversed number: $reverse"
```

INPUT & OUTPUT:

A screenshot of a terminal window with a dark background and light blue text. The prompt is (kali@kali)-[~]. The user enters 'vi rev.sh' and presses enter. The prompt changes to (kali@kali)-[~] and the user enters 'sh rev.sh' and presses enter. The script prompts 'Enter a number:' and the user enters '123'. The script outputs 'Reversed number: 321'. The user presses enter again, and the script prompts 'Enter a number:' and the user enters '3453'. The script outputs 'Reversed number: 3543'.

RESULT:

Hence, reversing number using shell script is executed successfully.
